Here are some short reviews, sent to us by people, who already use Remove Duplicate Pictures:"On our picture studio, as on any other, is stored a large amount of picture files. Some of them are used regularly, some of them not. To find needed picture file in our picture archive, where are stored thousands of picture files, is very hard. We had to hire a special employee, who categorized files in archive, but even such solvation was not perfect - we periodically received several thousands of files in a day, and a person who organized them, could not sort and organize them all and made a lot of errors. All this unsorted picture files collected, collected and collected... One day while real-time broadcasting pictures clips, prepared to transmission, were lost in all this chaos, and we were forced to break transmission. My colleague from another picture studio called me, when knew about incident, and advised to use Remove Duplicate Pictures. Over several hours all our thousands of pictures's were sorted and organized and even if we are gathering several hundreds of new images every day, Remove Duplicate Pictures easily append them to common picture collection - right from picture CD's! Thanks very much to all Remove Duplicate Pictures developers. picture file sorter, that they made, really help people."

Evan Willard, chief designer of design studio "Colors of Colorado" "At April issue of "My Computer" magazine I read that Remove Duplicate Pictures - is the easiest and most user-friendly way to sort, rename and organize picture files. I have large picture file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of picture files from Internet it became very hard to find something in my picture collection. I did not know what to do - variety of folders and in every of them are photo and picture files those I even never seen. I even wanted to stop collecting of picture files, but suddenly come in mind that article - and I downloaded and started Remove Duplicate Pictures. It was like a miracle - all my picture files were sorted, renamed, organized automatically, exactly as I wanted. Really useful picture file sorter - It is needed for everyone who has picture files and wants them to be in ideal order."

Christopher Garvin, picture collector "In our office periodically is collected variety of documents in electronic form - they are needed for statistics gathering. Every Friday i create consolidated report, based on information, gathered from them. Day by day, month by month office documents collected on our file server, their quantity increased and increased, and to work with them became harder and harder. One Friday i could not find one document, needed for weekly report, and spent weekends in the office, sorting all documents by author and department, where they were created. Already was Monday, but report was still was not ready. Engineers from technical department installed, to help me, a special program for files organizing. It sorted all documents in minutes, directly as I want - first part by date, second part by size, and third part by author. Needed documents were found and from that time my work became much easier - Thanks a lot to Remove Duplicate Pictures creators team."

Michael Werner, office manager

"I am working in archive department of large production company. On our servers most of documents are stored in archived state. We receive them daily and we needed, before appending to common storage, manually open every archive file, view it's content and sort it, according to documents, located in it. All was OK, but after extending of company production level we became to get more and more archived documents for processing. Finally, leaving on the work until late at night. To solve this problem was installed Remove Duplicate Pictures and now it do all itself. Very powerful program - how we could be without it?"

Nikolas Flatley, director of archive department in production company

"Our department store all non-private files, transmitted over satellite network. Every day we receive millions of new files. All this data must be somehow organized, so any of our clients could easily find among that files what he need. We tried all file organizing tools, presented on market - and chosen Remove Duplicate Pictures. Why? Extremely flexible settings. We set up different processing rules for picture, video, text, executable files and archives. No one other program can do it today. "
